

JNI Oncology Lectures

www.erasmusmc.nl/pathologie
Program September 2011 – June 2012

September 14

SALVATORE PECE

IFOM-IEO Campus, Milan, Italy

Stem cells and breast cancer: pathogenetic and clinical implications

October 26

OWEN SANSOM

Beatson Institute, Glasgow, UK

Investigating the interplay between Apc, KRAS and p53 mutations in mouse models of intestinal cancer

November 23

UGO CAVALLARO

European Institute of Oncology, Milan, Italy

Adhesion molecules in cancer: an old story with new players and mechanisms

January 25

JASON S. CARROLL

Cancer Research UK, Cambridge, UK

Understanding estrogen receptor function in breast cancer

February 22

GERHARDT ATTARD

The Institute of Cancer Research, London, UK

Biomarker-driven therapeutic strategies for castration-resistant prostate cancer

March 28

SAKARI KAUPINEN

Aalborg University, Aalborg, Denmark

Targeting of microRNAs for therapeutics

April 25

HOLGER GERHARDT

Cancer Research UK, London, UK

Tba

May 23

JAMES AMATRUDA

Southwestern Medical Center, Dallas, TX, USA

The developmental biology of germ cell tumors: from fish to humans

June 27

RENE MEDEMA

NKI-AVL, Amsterdam, The Netherlands

Cell cycle checkpoints and cancer
