

## OIC network data storage

The computers of all microscopes maintained by the OIC have a connection to a V: network drive on which you can temporarily store your data. You can then retrieve this data from your own computer.

To connect to this network drive on your own computer type [\\exds1.erasmusmc.nl/cluster-15\Apparaten\OIC](\\exds1.erasmusmc.nl/cluster-15/Apparaten/OIC) in a Windows Explorer address field. Each microscope has a corresponding folder into which the data is saved.

### !!! Reminder !!!

#### **You are responsible for backing up your data!**

The microscope computers should not be used for permanent data storage. If necessary data older than 1 month will be deleted without further notice.

Likewise, the OIC network drive is for data transfer only. Data older than 2 weeks can be deleted without further notice.

If you're interested to hire your own space on this data storage for permanent data storage, please contact Gert van Cappellen ([w.vancappellen@erasmusmc.nl](mailto:w.vancappellen@erasmusmc.nl), tel. 43578)
