Research subjects

-Ethics of Health Checks, Enhancement, Public Health Ethics

Biography

Eva Asscher is a geneticist, specialised in developmental biology. After her PhD on the Neural Development of *Xenopus Laevis* at the University of Cambridge 2006, she moved to the field of medical ethics. She did post-docs at the University of Tilburg (on the regulation of preimplantation genetic diagnosis) and the ErasmusMC (on enhancement). Recently she started a project on the ethics of health checks. She is also scientific advisor at the Health Council of the Netherlands.
