Research subjects

Research Ethics

Biography

- Bachelor and Master Biomedical Sciences at the Radboud University, Nijmegen. Including a Master in Epidemiology and minors in Health Law and Legislation and health Technology Assessment.
- Employed at the department since march 2011.
- First working as a junior researcher evaluating the Medical Research involving Human Subjects Act.
- Since march 2012 working as a PhD student concerned with ethical and legal aspects of clinical drug trials in children. Specifically, motivations of children and their parents to consent or dissent to participation in paediatric clinical research.
